FRESH WATER COOLING

Kit Specification: MFH-5230
MerCruiser 262-305-350
CID
Block & Manifold Cooling

**CONVERSION KIT FITS:**

MerCruiser Chevy based V6-V8 engines 262-305-350 CID both sterndrive and inboard. Especially designed for the low capacity raw water pumps used on sterndrive engines. Will NOT fit most engines with high mounted alternators and/or v-drives. Some engines have fuel line routing and fuel filter location that must be changed slightly. Heat exchanger is 4 1/8" x 23.5" long and fits within overall length, width, and height of most engine conversions. Heat exchanger extends from extreme starboard side of a normal exhaust manifold towards port side clearing most high mounted power steering pumps if any. See above illustration. Plastic expansion tank mounts either on front of heat exchanger or if space is limited on vertical surface next to engine.

COOLING SYSTEM TYPE

Full system: Engine block and exhaust manifold on fresh water system. Exhaust elbows remain on raw water system. System utilizes a new, unique, high performance heat exchanger, with built in, full flow, bypass control thermostat ensuring optimal jacket and exhaust manifold water flow under all operating conditions.

CONVERSION KIT

Kit includes heat exchanger, heavy-duty translucent plastic expansion tank plus all other components necessary to complete conversion. Some components from engine are reused. Heat exchanger is painted black. Brackets and other components painted black or zinc plated. All hose clamps are stainless.

HEAT EXCHANGER

Shell and tube type heat exchanger. Redesigned to achieve a higher cooling capacity. All copper alloy construction made to the highest industry standards. Heavy-duty dual de-mountable clean out end covers. Zinc anode protection.

COOLING SYSTEM CAPACITY

Will maintain engine temperature in the 160-170° F range using 160° F thermostat included in kit. System has cooling capacity safety margin higher than industry standards.

HEATER SYSTEM HOOKUP

Heaters such as galley water heaters and cabin heaters are easily connected to the system by utilizing the cooling system bypass connections.

INSTALLATION TIME

Typical average installation time is approximately three hours, assuming new engine and normal accessibility. Allow additional time for filling and testing. Installation skills are not beyond those of most do-it-yourself boat owners. Complete illustrated installation instructions are included in kit. Ordinary hand tools used.

WARRANTY

Two-year warranty on the complete kit. We will not be responsible for labor charges or any indirect or consequential costs or damages.

MONEY BACK GUARANTEE

Full refund if kit is returned within 30 days in original box and in undamaged condition.

PRICE

Trade and volume discounts available. Buy through your dealer or direct using Visa, MasterCard, American Express, UPS COD, or Money order.
