

## Breathe Life Back In Your Powered Vessel

*Introducing  
Crusader Power-Pack,  
the most economical way  
to repower your tired  
gas inboard.*

**Buy the base  
engine, fuel and  
ignition systems;  
keep the rest of  
your existing parts.**

**W**hen your inboard engine starts to fade, it may be time to repower. Some of your existing parts may work as good as new, so why waste money on unneeded equipment and installation?

Introducing Crusader Power-Pack™, the repower package that gives you what you need. Power-Pack is a 300 horsepower Vortec® base engine, equipped with a complete fuel system and ignition

system. By using existing hardware, bellhousing and exhaust systems, installation is made simple.

Power-Pack is part of a full line of premium gasoline engines from Crusader, the world's leading manufacturer of gasoline inboards for almost 50 years.
