

Crusader Power-Pack SD

Breathe Life Back In Your Inboard/Outboard Powered Vessel.

Introducing the
Crusader Multi-Port fuel
injected Power-Pack SD, the
most economical
way to repower your
tired carbureted or fuel injected
gas I/O. With Power-Pack SD,
you receive a new base engine,
exhaust system, fuel and igni-
tion systems and keep the rest
of your existing parts.

When your carbureted sterndrive engine starts to fade, it may be time to repower. Some of your existing parts may work as good as new, so why waste money on unneeded equipment and installation? And why repower with another carbureted engine when you can have all of the benefits of fuel injection.

Introducing Crusader Power-Pack™ SD, the repower package that gives you what you need. Power-Pack SD is a 330 horsepower Vortec® base engine with the latest in multiport fuel injection technology, equipped with an exhaust system to match your application, a complete fuel system

featuring the patented Fuel Control Cell with no need for a return line to the tank and complete ignition system. By using existing hardware and bellhousing, installation is made simple. The Power-Pack SD is available with all the features of a Crusader inboard, like speed control and engine synchronization in twin engine installations, as well as plug and play integration with the latest electronic gauges and displays.

Power-Pack SD is part of a full line of premium gasoline engines from Crusader, the world's leading manufacturer of gasoline inboards for over 50 years.
